AND METHOD OF MAKING AND USING THE BACKING
AND ABRASIVE PRODUCT**

5

Abstract

The invention provides a backing for an abrasive article comprising a sheet-like polymeric substrate having a first major surface including a pattern of non-abrasive raised areas and depressed areas and an opposite second major surface including a plurality of shaped engaging elements that are one part of a two-part mechanical engagement system.

10

An abrasive product is provided by coating at least the raised areas of the backing with an abrasive coating.
